

NEW!

*For the very highest demands:
the high-end awning system*

Ideal protection – the
weinor Opal Design Valance Plus/Lux with
perfect looks and technology

Always a clean finish

The front rail bar on the Valance Plus with valance is drawn deep inside the front rail of the awning on retraction. In the process, the patented floating bearing prevents the fabric roller from drooping, and wrinkles and creases from forming.

*The intelligent awning system –
well-engineered and beautifully shaped*

Superior quality meets an organic appearance: numerous intelligent functions – safely housed like a pearl in a shell

The weinor **Opal Design Valance Plus/Lux** is a match for any challenge that an awning will ever face, no matter how great. At a height of just 16 cm, the oval cassette is pleasingly flat, yet it still provides the ideal shelter for the awning's entire workings. The infinitely extendible **Valance Plus** provides additional shelter from inclined sunlight and curious onlookers.

The option Lux provides atmospheric terrace lighting.

The compact Agido is inconspicuously housed inside the front rail of the Opal Design/Lux and coordinates the retraction of the valance and the awning in blustery conditions.

Triple protection: sun protection, retraction protection and product protection in one complete package

The **Opal Design/Lux** is now available together with the **Valance Plus** as a complete package when ordered with the **WeiTronic** remote control, which includes the **WeiTronic Agido-868**. The energy-saving remote control system has been designed especially for awnings with extendible valance. This model not only comes with sun protection but

with a special retraction protection feature which prevents things getting swept away – because the main awning is only retracted once the **Valance Plus** has been retracted. With an exclusive **WeiTronic Agido**, which protects the product in the face of very blustery conditions, this is a top-of-the-range product that satisfies the highest of demands.

Exclusive product protection WeiTronic Agido-868

Exclusive to the **Opal Design Valance Plus/Lux** with **WeiTronic** remote control, the new battery-operated sensor provides extended protection. It recognises vibrations and other forms of movement and sees to it that the awning is retracted automatically – in the face of very blustery conditions, for example. With no wiring to worry about, it simply inserts into the front rail of the awning. The sensor is capable of running on two standard batteries for several years.

The beautifully-shaped, intelligent WeiTronic Combo-868 MVL receiver combines the motorised controls, Valance Plus and lighting in one single device. The combination receiver can be operated using weinor's tried-and-tested Remoto handheld remote control.

weinor awnings with a big choice of frame colours and beautiful fabrics

Exclusively from weinor: Choose from 140 exquisite fabric patterns, 47 standard frame colours, 8 highly scratch-resistant and dirt-repellent trendy conservatory colours (5% surcharge) as well as another 200 special RAL colours for your awning.

Shading device	000000959195

Important Informations:

Creases can form in the fabric and when folding the awning cloth. That can lead to the areas of the fold appearing darker when seen against the light, particularly with light colours. Folds in the fabric in the areas of the seam, border and panels can be caused by multiple layers of fabric and different diameters of rolled up fabric. The stresses in the fabric caused by this can lead to rippling (e.g. waffle or fish-bone shapes). This is normal to differing degrees with nearly all awning fabrics. Creases and folds in the fabric do not reduce the awning's value or its suitability for its purpose. Awnings and conservatory blinds are for protection from the sun and should be rolled up in rain and strong winds.

Wet fabric creases more easily and as far as possible should only be retracted after drying out (please take care in strong winds and avoid the formation of puddles). Depending on the colour of the ordered frame we supply all small parts as well as crank handles and drives for units with crank mechanisms in black (similar to RAL 9005), white (similar to RAL 9016) or grey (similar to weinor 7319).

We reserve the right to make technical changes. For technical reasons the colours may appear slightly different in print.
