Winner of the red dot design
award 2008 for high quality of
design

*The vertical awning that
offers sight- and sunprotection*

Whether windows or balconies – the VertiTex Universal
provides shade for widths of up to 6 m and is
transparent, air and light permeable

*Without VertiTex, your patio is wide open to cross winds, low-lying sun and peering looks.
With VertiTex, you can create a decent amount of privacy – and have protection from the elements.*

The attractive side shade for greater privacy

Feel right at home – well-protected from the low sun,
wind and curious onlookers

With the **VertiTex** vertical shade, you can shade your patio or your windows exactly as you please and block out the sun no matter where it stands. The modern Soltis® fabrics create a pleasant, well-protected and bright atmosphere – while still allowing you to see what is around you even through the fabric.

47 frame colours
at no extra cost
8 trendy conservatory colours (+5%)

Translucent fabric

The fabrics in the Soltis® collection are especially suited to the **VertiTex** as they allow you to look through but keep the wind out. They are also especially tear-resistant and dirt-repellent. Alternatively, you can opt for one of nine heavy-duty acrylic fabrics.

9 seamless acrylic fabrics

A little awning with a big choice of colours

Exclusively from weinor: Choose from 47 standard frame colours, 8 highly scratch-resistant and dirt-repellent trendy conservatory colours (5% surcharge) as well as another 200 special RAL colours for your awning.

weinor acrylic fabrics, with their high quality workmanship and tear-resistance, are noted for their exceptionally long lives. Special finishing processes also make them particularly UV resistant. Use of the latest nanotechnology gives weinor's fabrics exceptional dirt- and water-repellent properties.

The wipe test proves it: trendy conservatory colours are both scratch-resistant and exceptionally dirt-repellent.

Coordinated aesthetics all in one

With its connecting cover caps, the shade in your conservatory will appear completely uniform and form an enclosed area.

Perfect for patio roofs, conservatories or windows

Since the weinor system all comes from one and the same source, everything from the technology to the colours matches up perfectly

The **VertiTex** system can be used in many ways thanks to its sophisticated technology. It can also be retro-fitted easily and blends in harmoniously with our **WeiTop** roofs. What's more, as everything at weinor comes from one and the same source, the colours always match perfectly!

Convenience by remote control

You can control your **VertiTex** in total comfort from your favourite spot.

Shading for large areas ...

... with the VertiTex – for widths of up to 6 metres

Pleasant sun and sight protection without interruption, even for large facades

The **VertiTex WeiTop** vertical shade is simply hung into the guttering of the weiner patio roof or conservatory, the side fittings are screwed in and you can immediately move unhindered on your patio or in your conservatory. With a maximum width of 600 cm and a height of 240 cm, even large areas can be shaded without interruption.

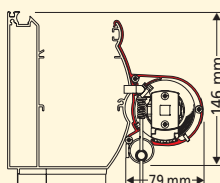

Thanks to its various installation possibilities, the **VertiTex Universal** is, of course, also suitable as a shade for your windows or your balcony. The small casing and the unobtrusive wire guide blend into the surroundings and form a unified whole with the windows. The **VertiTex Universal** can be retrofitted easily.

Motor plus remote controls equals comfort

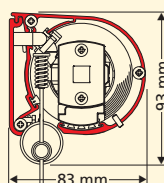

Needless to say, the vertical shade comes equipped with a motor as standard. With the **WeiTronic Remoto** remote control, you can adjust the height of the shade to just where you need it from the comfort of your favourite chair.

The **WeiTronic** weather sensors provide yet more comfort. These sensors open the shade in sunny weather and retract it when it's raining or windy.

Perfect and simple installation of your vertical shade

VertiTex WeiTop – for hanging in your guttering

VertiTex Universal can be mounted on a wide variety of surfaces

Award-winning design

weinor is known for its first-rate product design – and now has the award to prove it! The weinor **VertiTex** has received the internationally acclaimed **red dot award** from Design Zentrum Nordrhein Westfalen.

We are committed to the very highest quality

weinor puts a lot of emphasis on quality, from the design and materials to workmanship, mounting and service. If handled appropriately, the **VertiTex** will withstand weather influences a life long.

Proven top quality

Awning technology for the highest demands

VertiTex technology you'll embrace for a long time

Thanks to the patent pending "floating bearing with brush mechanism", the fabric is far less prone to creasing.

Stainless-steel guide bolts and the floating bearing connection to the front rail make certain that there is enough play to withstand strong winds. The bolts ensure that the shade can be opened and closed safely without jamming.

Made in Germany – certified top weinor quality

Quality is our first commandment. That is why most of our products are certified by the German TÜV. weinor invests a lot in the development of new products. The result: innovative products made in Germany.

Longevity

We don't cut corners on the big or small parts: All our small parts such as screws, nuts and bolts are of stainless steel so they will last an eternity. All other parts are powder coated in an elaborate process. This makes them impact and scratch resistant.

The best advice from your experts

The best way to get an idea of how your patio will look with the **VertiTex** is to get advice from an expert. Our competent dealers will be happy to advise you, giving you sound advice and assistance on all technical and aesthetic matters.

▲ weinor awnings

▲ weinor patio roofs

Your dream patio at any time of year

▲ weinor conservatories

No matter what you want to use your patio for, weinor has the right product for you – awnings, patio roofs and conservatories

As an experienced awning specialist, your weinor dealer will help you throughout the process, from planning to completion. They will help make your patio dreams come true and will support you with advice and help. That way you stay on the safe side at all times.

Important Informations:

Creases can form in the fabric and when folding the awning cloth. That can lead to the areas of the fold appearing darker when seen against the light, particularly with light colours. Folds in the fabric in the areas of the seam, border and panels can be caused by multiple layers of fabric and different diameters of rolled up fabric. The stresses in the fabric caused by this can lead to rippling (e.g. waffle or fishbone shapes). This is normal to differing degrees with nearly all awning fabrics. Creases and folds in the fabric do not reduce the awning's value or its suitability for its purpose. Awnings and conservatory blinds are for

protection from the sun and should be rolled up in rain and strong winds. Wet fabric creases more easily and as far as possible should only be retracted after drying out (please take care in strong winds and avoid the formation of puddles). Depending on the colour of the ordered frame we supply all small parts as well as crank handles and drives for units with crank mechanisms in black (similar to RAL 9005), white (similar to RAL 9016) or grey (similar to weinor 7319). We reserve the right to make technical changes. For technical reasons the colours may appear slightly different in print.
